## ON THE SPOTLIGHT

Indonesia Tycoons Vying for \$3 Billion Tissue Brand Vinda

Asia Pulp & Paper Co., an arm of the late billionaire Eka Tjipta Widjaja clan's Sinar Mas Group, recently made a preliminary proposal to buy a significant holding in Vinda International Holdings Ltd., Bloomberg News reported last week. It's in talks with lenders to finance the potential purchase and has offered to buy a Vinda stake at more than HK\$20 per share, according to the people, who asked not to be identified as the information is private. APP, one of the world's biggest pulp producers and also sells tissues in China under brands such as Breeze and Virjoy, faces competition from Indonesian businessman Sukanto Tanoto's RGE Pte, which has operations spanning palm oil to energy. RGE, which also runs a pulp and paper business, has been working on a potential offer for a controlling stake in Vinda, Bloomberg News reported last month.

#### **GLOBAL MARKET BRIEFS**

Asia markets rise ahead of Biden-Xi talks. Asia-Pacific markets rose on Tuesday as investors look ahead to highly anticipated talks between the U.S. and China as well as more economic data. U.S. President Joe Biden and China's President Xi Jinping's will meet in-person in San Francisco later in the day, for the first time in about a year.

Moody's warning on the massive U.S. debt burden has turned into a nonevent. Markets on Monday shrugged at a warning Friday from Moody's Investor's Service that it was lowering its ratings outlook on Treasurys. When Standard & Poor's and Fitch issued similar warnings, they sent at least temporary shockwaves through Wall Street. But with the domestic fiscal and political mess seemingly old news, the ratings service saber-rattling just doesn't seem to have the same impact.

## **NEWS FLOW**

## **CHART OF THE DAY**

China's Economic Recovery Is Losing Momentum, Data Show. China's consumption rebound slowed and private business confidence lost momentum in October, according to independent surveys and alternative data that suggested the economic recovery remains bumpy. An indicator of Chinese consumer demand for recreation and transport published by Paris-based QuantCube Technology, along with an independent survey of consumer sentiment by US company Morning Consult, both fell in October from the previous month. A poll of private business sentiment from the Cheung Kong Graduate School of Business also declined in the month. Those measures — together with official data showing weak service sector growth and falling consumer prices in October — imply the nation's consumption rebound struggled last month, even as Beijing announced more fiscal stimulus.

The APEC Secretariat's Policy Support Unit issued new forecasts on the eve of the APEC leaders' summit in San Francisco, showing that the 21-country region's growth rate would dip to 2.8% in 2024 from 3.3% in 2023. The APEC GDP growth rate will average 2.9% in 2025 and 2026, below the global average of 3.2% and 3.5-3.6% in the rest of the world.
